

LIFT SHARING

Sharing a lift is environmentally friendly and should share out costs. Lift sharing also reduces the amount of car parking needed at our site.

However, all arrangements which you make are private arrangements between you and other sharers. We do not arrange lift sharing or have any liability to or for lift sharers.

Remember - Safety First:

- Make sure you know the identity of the person or persons you are sharing with.
- Having the driver's home telephone number (land line) is sensible precaution and make sure you leave details of the lift share, the driver and passenger's number(s) and home address if possible with friends and/or family.
- Take your mobile phone with you.
- If you are at all uncomfortable with any arrangements, or the condition of the vehicle being used, then make other plans. If a vehicle is not taxed it is quite possible the driver has no driving licence, no insurance and the vehicle is in a poor condition.

Safety first: Trust your instincts and use common sense.
